News that's a ruse!

BEWARE YE OF RESTLESS SPIRITS!

LOST GRAVES! **BODY COLLECTORS!** **ROWDY TAVERNS!**

Oh My!

Watch where you walk! Research from Kimberly Morrell of the Philadelphia Archaeological Forum has uncovered and consolidated hundreds of previously unknown burial places. These include cemeteries for various faiths, potters fields for the indigent, and mass graves. Many of these sites were moved to other cemeteries, but over 270 remain, and could be under your feet without you knowing! Be especially careful in Old City, since there's thousands of Revolutionary War soldiers and patriots (and they can NOT be happy with the way things are going lately).

We may be a city of fine learning institutions, but that knowledge comes at a price. Over 15,000 specimens of human remains are held in various museums across the city, as data published by the Philadelphia Inquirer reported in 2023. The Mütter Museum recently released a new policy about their holdings of 6,300 remains, following on the heels of Penn's Museum updating policy for their 10,000+ human specimens. While Penn and Mütter have the highest totals by far, other museums such as the Temple Anthropology Lab and Museum and the Wagner Free Institute also have smaller numbers in their collections.

As one of the oldest and biggest cities in the United States, Philadelphia lacks no nightlife scene, a trend that reaches back centuries. Some of the most famous taverns and Inns used to call our fair city home, with many more nearly forgotten. Research from our editor (using Peter Thompson's 1999 book *Rum Punch and Revolution: Taverngoing and Public Life in Eighteenth-century Philadelphia* as a main guide) places many of these pubs on the map. Not a comprehensive list to be sure, but these 20+ taverns were able to be located within a block based off other records. Though the others have been lost to time, exercise caution when wandering the city-there is no shortage of restless spirits (liquor and ghouls) among our community.
